Hi Lorrie,

Actually I was just asking that the lat long map be included in the official amendment letter along with the State plane coordinate map. It was not clear to me if the lat long map, which had been included in the earlier informal submission, was in the formal submission. I asked only because HQ is trying to build a national data base of exemptions and I did not know if the State plane coordinate map would meet their preferences. David Murry explained the State plane map was the only map included in the latest e-submission because it contained the engineer's seal. The other lat long map did not. Joe Tiago, HQ, informs me that lat long is preferable, but if it is not submitted, they can convert the official map to lat long to meet their purposes. So we are good either way. Thanks.

Subject: Additional Items Requested - UEC Goliad Aquifer Exemption

---

Hello Ray,

You had requested earlier this afternoon that TCEQ send the October 3, 2012 letter from UEC regarding the Goliad aquifer exemption, as well as a revised aquifer exemption map. I have attached these two items to this email – hard copies of these items can also be sent. Please let me or David Murry know if you have questions or need additional information.

Respectfully,

Lorrie

Re: Request for Aquifer Exemption Area Reduction for Sand A: UEC Permit No. URO3075 Goliad Project

Dear Mr. Covar:

On July 31, 2012 UEC filed a request to reduce its aquifer exemption area from 423.8 acres to 307 acres. In that request, an updated Aquifer Exemption (AE) Map was included delineating the newly proposed AE Boundary. Subsequent to the July 31, 2012 submittal, UEC made a decision to further reduce the lateral bounds of the AE Boundary for Sand A. The vertical depth of Sand A production remains unchanged. As described in the permit application, the average depth of Sand A is approximately 99 feet below ground level and it is approximately 65 feet thick. A revised AE Map is enclosed showing the proposed new AE Boundary for Sand A, as well as the AE Boundary for Sands B, C and D. The attached map supersedes the map that was provided in the July 31, 2012 request. A review of the map shows that Sand A production area comprises approximately 96 acres.

UEC appreciates your assistance in this matter. If you have any questions, please do not hesitate to contact me.

Sincerely,

Harry L. Anthony  
Chief Operating Officer
